

Communications operators from throughout the district continue to be trained and added to the team. We provide new member training, and quarterly workshops for all.

Several members also attended COML or COMT training and continue to work on their position task books in 2019, Two Members were certified as COML and COMT.

During this year your communications team and vendors, in cooperation with District 8 communications solved an intermittent interference problem at the North repeater

At the Control Point, Michael Torosian continues to update Run Cards, oversee our communications and managing the lamresponding application. He also continues to be available for outreach to district Communications Centers for control point training and education.

Communications staff continue to build out the Zello for First responders' network. We added 2 new Communities, and 3 radio gateways. The system hosts 300 plus subscribers with 125 channels. We have connections to District 7 and 8 as well as to 14 other mutual aid partners.

A major project of 2020 with the Standardization Committee of updating and formalizing SOG's was completed.

Respectfully Submitted,

Brian Roberts COML, COMT
